

# Why WeatherWise®?

# The Wise Choice

## Quality Materials

The main ingredient in *WeatherWise*® Vinyl is PVC. Added to the mix is TiO<sub>2</sub>, an ultraviolet inhibitor that prevents yellowing. In order to provide impact resistance and weatherability, controlled quantities of specialized components are also added to the blend. The result is a high quality fence that will last for years with minimal upkeep.

## Easy Installation with Professional Results

*WeatherWise*® Fence Systems are packaged for hassle free installation. One feature that allows for easy installation is our crimped horizontal rails that pass through the routed posts. *WeatherWise*® Fencing Systems stand strong for years and are backed by a lifetime warranty!

## Limited Lifetime Warranty

*MVP* warrants to the original consumer purchaser that *WeatherWise*® vinyl fencing and railing products are free of defects in workmanship and materials and that, in the course of normal and proper use, its vinyl products will not chip, peel, blister, flake, be damaged by pests, or have abnormal weathering.

## Environmentally Friendly

*WeatherWise*® Fence Systems are built with concern for our customers, our community, and the environment. *MVP* consistently follows the "Reduce, Reuse, Recycle" model by recycling post-industrial vinyl materials right from our facility. Our fences will inspire confidence while complementing and enhancing the beauty of your home. *WeatherWise* Fencing will improve your property's overall value and appearance. *WeatherWise*® is designed to produce the results for your home that you deserve!
